JANUARY–FEBRUARY / JANVIER–FÉVRIER

ARTICLES

C.J. Flood, G. Giuliani, and H.M. van Driel Pulsed electro-optic modulation for efficient, active continuous-wave laser mode-locking 1

M. Florjańczyk and R. Tremblay Tapered optical couplers with grating: Beyond the weak-guidance limit 5

R.J. Essiambre and R. Vallée Pulse compression, shaping, and pedestal suppression using a nonlinear twin-core fiber in a loop configuration 11

Jian-Luo Zhang and John W.Y. Lit A symmetric figure-of-eight optical fiber resonator 20

H. El-Kashef Frequency stabilization of laser resonators using a new temperature-compensated piezo-mirror translator 25

Yves Champagne and Nathalie McCarthy Analysis of the stability of multiple-phase-shift distributed-feedback semiconductor lasers 29

Luc R. Bissonnette and Daniel L. Hutt Multiple-scattering aerosol lidar inversion method 39

H.M. van Driel and G. Mak Femtosecond pulses from the ultraviolet to the infrared: Optical parametric processes in a new light 47

Marie-Claire Gazeau, Véronique Wintgens, Pierre Valat, Jean Kossanyi, Denis Doizi, Gerard Salvetat, and Jean Jaraudias New experimental method for determining the $S_1 \rightarrow S_n$ absorption spectrum of highly fluorescent dyes 59

Pierre Provencher, Christian-Yves Côté, and Marguerite-Marie Denariez-Roberge Surface second-harmonic susceptibility determined by noncollinear reflected second-harmonic generation 66

Marc Couture and Michel Piché Focusing properties of an axicon pair 70

Sophie LaRochelle, François Ouellette, and Jocelyn Lauzon Two-photon excitation and bleaching of the 400 nm luminescence band in germanium-doped-silica optical fibres 79

NOTE

Claude Carignan, Michel A. Duguay, François Ouellette, and Marie-Hélène Talon *Note*: Glass-sandwich structure for one-step writing of optical wave guides in photopolymers 85

MARCH–APRIL / MARS–AVRIL

PART I

STATEMENT / ÉNONCÉ

Donald D. Betts Statement of Editorial Responsibility for this Issue of the *Canadian Journal of Physics*/Énoncé des responsabilités éditoriales pour ce numéro de la *Revue canadienne de physique* 89

ARTICLES

I.R. Dagg, A. Chanda, H.P. Gush, W.C. Ho, and I. Ozier Electric-field-induced Q branch of the vibrational fundamental of CO 91

Hany H. Sherief and Magdy A. Ezzat A problem of a viscoelastic magnetohydrodynamic fluctuating-boundary-layer flow past an infinite porous plate 97

M. Ayachi Mise au point d'une méthode de détermination de la température moyenne de la mésosphère à partir de la mesure de la vitesse de phase des ondes longues sur un trajet grande distance 106

N.L. Singh, S. Agarwal, and J. Rama Rao Excitation function for α-particle-induced reactions in light-mass nuclei 115

Y.P. Varshni WKB approximation for the rotating Morse oscillator 122

E. Träbert and E.H. Pinnington Beam-foil lifetimes measured for intercombination transitions in Zn-like and Ga-like ions of Mo 128

M.R.M. Witwit Quasi-bound state calculations for several types of potential in one-, two-, and three-dimensional systems, using perturbative techniques 133

L. Wang, J.R. Xu, and W.E. Jones CARS (coherent anti-Stokes Raman scattering) investigations of the intermolecular vibrational energy transfer between nitrogen and carbon dioxide molecules 142

S. Roy Morrison 1/*f* Noise from levels in a linear or planar array: Dislocations in metals 147

NOTES

J.E. Hardy *Note*: The vector-ladder operators for the rotation group O_3 152

A.K. Handoo and P.K. Ray *Note*: Sputtering of cobalt and chromium by argon and xenon ions near the threshold energy region 155

G.N. Ord *Note*: The Feynman chessboard in a box 159

Cihat Ozhasoglu and M.L. Rustgi *Note*: Nuclear charge density radius parameter and the β decay between mirror nuclei 162

COMMUNICATIONS

A. Mysyrowicz et E. Fortin *Communication*: Superfluidité excitonique dans Cu_2O 165

A. Widom, E. Sassaroli, and Y.N. Srivastava *Communication*: (1/ω) Noise and the dynamical Casimir effect 168

B. Margolis and S. Punch *Communication*: Simple quark mass matrices and mixing 172

COMMENT / COMMENTAIRE

A.C. Le Floch *Comment on*: Born–Oppenheimer breakdown in the ground state of carbon monoxide: A direct reduction of spectroscopic line positions to analytical radial Hamiltonian operators 175

REPLY TO COMMENT / RÉPLIQUE AU COMMENTAIRE

John A. Coxon and Photos G. Hajigeorgiou *Reply to comment on*: Born-Oppenheimer breakdown in the ground state of carbon monoxide: A direct reduction of spectroscopic line positions to analytical radial Hamiltonian operators 177
